Package: OncoTree (via r-universe)

August 24, 2024

Title Expose the OncoTree API for R

Version 0.0.0.9000

Description Expose the OncoTree API for R. OncoTree is a standardized
ontology of cancer terms that is used to annotate cancer data.
This package provides a set of functions to query the OncoTree
API and retrieve information about cancer types, subtypes, and
their relationships.
